Hello,

The following submission has been created.

Track Name: Security & Privacy

Paper ID: 1203

Paper Title: Evaluating the Effectiveness of Cybersecurity Awareness Training in Organisations

Abstract:

: Human error is one of the most critical and enduring factors that lead to cybersecurity attacks in organisations in the modern digital environment. Even with significant investment in the use of technical security infrastructure, employees still pose a serious weakness due to their exposure to phishing attacks, social engineering, bad password habits, and failure to adhere to security policies. The Cybersecurity Awareness Training (CAT) programmes have become one of the leading countermeasures to deal with this human-centric risk. Nonetheless, there is limited empirical evidence on their quantifiable effectiveness in various organisational situations. The given paper is a rigorous mixed-methods assessment of a structured cybersecurity awareness training program that was delivered in a mid-sized organisation throughout six months. Measurements of behavioural and attitudinal change were quantified using pre- and post-training tests including simulated phishing tests, knowledge surveys, security compliance audit and incident report analysis. According to the results, the rate of phishing detection has increased by 35 percentage points, the number of security incidents has decreased by 67 percent each quarter, and the adherence to password strength and compliance with security policies has significantly improved. The analysis of training delivery methods shows that simulated phishing exercises and gamified modules have the highest scores in terms of effectiveness. The results form a robust empirical argument on the effectiveness of structured, multi-modes, cybersecurity awareness training as a low-cost organisational security intervention.

Submission Questions Response:

1. Undertaking

I have reviewed the "Instructions for Authors" on the AIRSE 2027 website (<https://airise.co.in/>)

[guidelines-for-authors/](#))

I am aware that only registered authors receive notifications from the CMT portal. Therefore, I have ensured that all co-authors have been added to the CMT portal for this submission

I confirm that the names and author sequence are accurate and understand that no further modifications are allowed

Additionally, I certify that all co-authors' details, including their affiliations and email addresses, are correctly included in the main manuscript

Thanks,
CMT team.
